

The Management of the Organization is committed in providing a safe and healthy environment for its students, academic and administrative staff, and any visitors entering its premises. It is the responsibility of every member to acknowledge and comply with the Health and Safety regulations.

The responsibility begins at the working level and extends upwards to Supervisors, Managers, Directors, Head of Departments, Deans and up to the highest level of administration. It is essential that each of us takes an active part in initiating preventative measures to control and eliminate hazards associated with our activities according to proper guidance.

The Management in collaboration with the Health and Safety Committee of the Organization are making reasonable efforts to provide an environment that minimises the occurrence of dangers, such as accidents, health problems and the destruction of property. This includes:

- Safe working methods and procedures
- Training on Health & Safety issues for all employees.
- Provision of equipment and systems as per Health and Safety rules and regulations.
- Discussions, regular consultations and submission of proposals on health and safety issues.

A safe working culture is the responsibility of everyone and this can be best achieved through cooperative efforts of employees and students. A safe culture is reinforced by:

- Continually identifying, assessing and controlling possible risks for the health and safety of people that may arise in the workplace.
- Providing information concerning such risks and the instruction, training and supervision of employees to ensure safe work practices.
- Giving employees and students the opportunity to participate in health and safety decisions that affect them via their representatives respectively in organization's Health and Safety Committee.
- Continually monitoring subcontractors entering our premises for several works.

The main objective of our organization is to comply with all relevant professional and environmental regulations and laws.

In the interest of maintaining safety and good health within our organization, contractors and their employees, visitors and customers are required to observe and comply with all health and safety standards and rules applied. This includes any safety signage or warnings, or instructions given by any employee whilst on our premises.

It's the Organization's request that each member of the personnel accepts and complies with the health and safety rules and regulations. Our positive safety attitude, our knowledge on safety methods in the working environment and the correct risk assessments which are revised, regularly, will determine the success of the management's program on health and safety.

Yours sincerely

Loukia Polygerinos - Tzyrkas
Director
Human Resources Department
