

European University Cyprus is committed to promoting green policies for campus and the environment through the EUC environmental committee which has been established since April of 2013. The committee consists of faculty, staff, student representatives and many volunteers. The terms of reference for the environmental committee are the following:

- **Provide advice** at the EUC administration on environmental issues.
- **Submission of proposals and implementation of actions for improvement** of environmental conditions of work and study at European University Cyprus.
- **Promotion of actions for its "green" policy** and networking with related authorities for implementation of environmental priorities
- **Promotion of environmental awareness, development** of proposals and materials
- **Establish indicators and targets** for sustainability that will enable monitoring, reporting and continuous improvement.
- **Minimum possible aggravation** of the natural environment through the optimal use of natural and energy resources and taking actions related with recycling in the University.
- **Compliance** with the applicable environmental legislation.

The targets of European University Cyprus for the period 2018 - 2020 have been determined as follows:

- Installation of a photovoltaic project of 210kW into a parking lot near EUC premises.
- Energy audit of the entire premises of EUC & Cyprus College Limassol, according to the law N.149 (I) / 2015
- Installation of a new voltage optimization system at the Western Building of EUC.

Yours sincerely,

Loukia Polygerinos - Tzyrkas

Director

Department of Human Resources
