

## **The School of Sciences**

### **Department of Life Sciences**

**The mission** of the Department of Life Sciences is to educate and inspire students and researchers following the highest professional standards by providing an innovative learning experience that enhances their competencies for successful employment opportunities. Our programs promote the spirit of responsible research and innovation to advance knowledge in Life Sciences to better align its outcomes with society's values, needs, and expectations.

**Our vision** is to become a regional multidisciplinary center of excellence in Life Sciences, to produce high caliber students and researchers with innovative approaches to education and research.

The core **Values** of the Department of Life Sciences are:

<b>Excellence</b>	In the conduct of education, research and community engagement,
<b>Integrity</b>	Acting with honesty, accountability and social responsibility in everything we do,
<b>Respect</b>	Demonstrated by civility and communication worthy of the trust given to us as instructors/teachers, scholars and researchers,
<b>Collaboration</b>	Fostering creative partnerships with open communication equipping graduates with competitive skills for industry,
<b>Community</b>	Dedication to improve the quality of life of the community,
<b>Transparency</b>	Providing an atmosphere of openness to promote equality of opportunities in education, research and workplace.
