Department of Computer Science and Engineering

Mission Statement

The Mission of the Department of Computer Science and Engineering is to educate and empower students and postdoctoral fellows in accordance with the highest professional standards; to provide quality education preparing graduates for successful employment opportunities. Our programs strongly support synergies between teaching and innovative research, both theoretical and applied, to advance knowledge in scientific fields and engage in industry and community participation as to promote knowledge, ethics and science.

The **Vision** of the Department of Computer Science and Engineering is to continue to provide high quality education opportunities for all students. Aspire to become a leading university in the region, offering excellence in teaching, research and service with a strong student focus as well as a pillar of the community with social responsibility.

The core **Values** of the EUC Department of Computer Science and Engineering are:

Excellence in the conduct of student centered education, research and community engagement ensuring the sustainability of our programs

Integrity Acting ethically with accountability & social responsibility

Respect Demonstrated by civility and communication worthy of the trust given to us as instructors/teachers, scholars and researchers

Collaboration Fostering creative partnerships with open communication, equipping graduates with competitive skills for industry and aiming to improve the quality of life of the community

Transparency Providing an atmosphere of openness to promote quality and equal opportunities in education, research and market
