

**Name of Program: Business Administration
(DBA)**

Degree: DBA

This is a program designed for highly motivated students wishing to become independent scholars, researchers, and professionals, who can work at a local or an international level. Throughout the studies, students develop their research, analytical, conceptual and critical thinking skills to the highest level. They also gain a strategic focus that will enable them to contribute to their own professional practice and the wider subject area. Through this doctoral program, the School of Business delivers the highest quality management education seeking to further enhance the doctoral students' research, management skills and knowledge.

EMPLOYMENT OPPORTUNITIES:

D.B.A graduates will acquire the necessary conceptual and professional skills to pursue careers in a business and academic environment in Cyprus and abroad. The methodological skills they will acquire, combined with the practical nature of their dissertation qualifies our D.B.A graduates with career prospects in consulting and high level management. Graduates develop the highest-level thinking and research that contribute to a successful professional career.
